

Campus Sustainability Council Notes  
March 24, 2017, 3:00-4:00

## **Introduction**

Everyone introduces themselves. **We will invite someone from communications next time.**

## **Sustainability Award**

Summary of the sustainability award, details are available on the website. **The CSO will put together a committee for this soon.**

## **Final edits on the sustainability strategy**

What's happened in the last month:

- The Academic Working Group met once more, added a new target.
- Alana also met with Capital Projects folks.
- Executive Priority and Planning will be looking it over and giving the final pass on 4-4

Laurel mentions that PACE course (its objectives? As an example?) might be incorporated into the document: Section 1, Target 3

Laurel describes plans for PACE administration

## **Community of Practice**

Alan mentions his proposed changes to Goal 4.3, Target 5, about establishing a community of practice. **He will e-mail it to the CSO for review.**

Laurel mentions that community of practice came up at the executive meeting. Currently she leads/reports on sustainability efforts with executive. What is the best umbrella for sustainability to fall under is a continuing challenge.

Perhaps the chair of the committees (AWG, others?) should have broader role in responsibility for sustainability initiatives on campus?

Devin mentions that the AWG wants to expand.
