INTRODUCTION

The Criminal Justice program examines topics including law, crime, offenders, victims, the criminal justice system and other forms of social sanctions and controls. Our students learn about historical and contemporary explanations of crime, and become familiar with research literature in criminology and on criminal justice agencies such as police, courts, and corrections. Students are challenged to think critically about key issues confronting the criminal justice system, the strengths and limits of possible reforms, as well as the ethical dilemmas facing criminal justice practitioners.

Graduates may find career opportunities in policing and law enforcement, institutional, community or youth corrections, victim services, public policy, criminal justice or social welfare programming, evaluation and research. The program also provides a strong background for those who wish to pursue graduate studies and law school.
