DEGREES/PROGRAMS OFFERED

3-Year BA

INTRODUCTION

Developmental Studies is a distinct field that draws on the integration of the perspectives and methods of many disciplines to provide a coherent analysis of the biological, environmental, and social factors that influence both individual and group development. As such, it has specific relevance for a growing number of occupations and professions, notably child care, gerontology, and family studies.

The Developmental Studies Program is an Interdisciplinary Major which differs from a regular Major program in that it is composed of offerings from several different departments. The program includes courses from the Departments of Anthropology, Biology, Business and Administration, Chemistry, Conflict Resolution Studies, English, Geography, History, Kinesiology and Applied Health, Mathematics, Philosophy, Politics, Psychology, Sociology, and Statistics. As a student of Developmental Studies, you may choose to pursue one of three streams: Stream A: Individual Human Development, Stream B: Comparative Biological Development, or Stream C: Child Development and Child Care.

Students who major in Developmental Studies (Stream A or C) may qualify for employment in government positions or in institutions dealing with early-childhood services. For those interested in pursuing this field, graduate work prepares them for research, administration, and university teaching.

All students pursuing majors are required to select courses from various groups as indicated below, depending on the stream selected. In addition, students wishing to orient their program towards specific educational goals are advised to seek advice early in their program for appropriate course selection. For more information, visit <https://www.uwinnipeg.ca/developmental-studies/index.html>

Under special circumstances, the student may elect to complete the internship over a four-week block of time (equivalent of 20 full days), after consultation with and approval of the instructor. Students will be required to develop a major project that provides a focused learning experience in their internship placement. The Topics in Leadership in ECCE course will be taught in conjunction with the advanced internship, giving students the opportunity to exchange perspectives on a broad range of issues relating to their respective fields. Students will gain information and skills through in-class discussions and presentations, reporting on experiences gained through their internship placements, and individual research and readings.
