INTRODUCTION

The study of Geography is concerned with the Earth in two ways - as the science of interaction between natural elements of the environment, such as weather, plants, soils, and landforms and, secondly, as the science of the distribution and activities of the Earth's population in response to various social and environmental factors. Systematic studies in Geography examine the locations, distributions, arrangements, and associations between groups of interrelated features. In contrast, regional studies examine the totality of geographic phenomena in a particular area. No matter what approach is taken, there are certain skills and techniques that are of particular geographic relevance (e.g., remote sensing, cartography, Geographic Information Systems).

As a reflection of the diversity that exists within the study of Geography and the special skills required, the Department offers courses within five areas of study: General, Physical Geography, Geomatics (formerly Techniques), Systematic Human Geography, and Regional Geography. One may earn either the 3-Year or 4-Year Bachelor's degree in Arts or Science, as well as the BA Honours or BSc Honours degree. Students pursuing a 3-year or 4-year BSc also have the opportunity to take a Business Stream - a set of core courses in the Faculty of Business that will provide them with the skills needed to enter and succeed in industry and business. See the "Science with a Business Stream" section of this Course Calendar.

Geography offers a considerable variety of career opportunities. High schools require a continuing supply of Geography teachers. Various federal and provincial agencies dealing with conservation, urban planning, recreation, landscape architecture, and resource use also provide opportunities, especially to those with Honours or graduate work in Geography. Undergraduate training in the subject is often required for certain business careers, especially in surveying, market assessment, and location and general commercial development. Training in Geographical Information Systems is especially in demand.

**Geography Courses Which Satisfy the Social Science Requirement for 4-year BA, BBA and BKin degrees**
The Social Science requirement will be satisfied by 12 credit hours from courses in Systematic Human and/or Regional Geography (i.e. courses for which the second digit of the course number is a 4 or 5).

**4000-Level Courses:** Minimum 3.0 GPA (B) in major courses (students lacking the requisite 3.0 GPA should consult the department concerned regarding eligibility to take 4000-level courses). Permission of the department is required for each 4000-level course.

**COURSE LISTINGS**

Geography courses are categorized into five major groups: General, Physical, Geomatics, Human, and Regional. Courses are distinguished by the use of the second digit in the course number as follows:

<table>
<thead>
<tr>
<th>Group</th>
<th>Second Digit</th>
</tr>
</thead>
<tbody>
<tr>
<td>General</td>
<td>1</td>
</tr>
<tr>
<td>Physical</td>
<td>2</td>
</tr>
<tr>
<td>Geomatics</td>
<td>3</td>
</tr>
<tr>
<td>Human</td>
<td>4</td>
</tr>
<tr>
<td>Regional</td>
<td>5</td>
</tr>
</tbody>
</table>

Examples:
- General: Second digit is 1 (e.g. 1102(3) Introductory Human Geography: People, Culture and Environment)
- Physical: Second digit is 2 (e.g. 1201(3) Introductory Atmospheric Science)
- Geomatics: Second digit is 3 (e.g. 2309(3) Statistical Techniques in Environmental Analysis)
- Human: Second digit is 4 (e.g. 2407(3) Recreation Geography)
- Regional: Second digit is 5 (e.g. 2503(3) Manitoba’s Physical and Human Environments)
Beyond the minimum requirements for each degree, students may choose courses which provide a coherent specialization within the discipline. Guidelines to assist in this selection are included in the Departmental brochure, which is published annually and available from the Department secretary in 5L02.
