INTRODUCTION

Interdisciplinary Linguistics examines the complexities of human language across a variety of university departments. In this program, students explore elements of language structure, the relationship between language form and meaning, language variation and change over time, as well as issues of language use in daily communication in various social and cultural contexts.

Through a 3-Year BA, 4-Year BA, or Honours BA, students investigate written and spoken, literary and non-literary texts from relevant theoretical perspectives. Linguistics courses are taken in several departments: Anthropology, Conflict Resolution Studies, Developmental Studies, English, Modern Languages and Literatures, Philosophy, Psychology, Religion & Culture, Sociology, and Rhetoric, Writing & Communications, hence the interdisciplinary nature of the program. Students taking an undergraduate degree in another Major may choose to add a Minor in Linguistics as a secondary area of interest.
