INTRODUCTION

Neuroscience is the branch of the natural sciences concerned with how the brain and the nervous system control behaviour in both health and disease. This rapidly developing research area includes all aspects of the structure and function of the nervous systems in humans and nonhuman species. It is interdisciplinary in nature and seeks to merge perspectives from molecular biology, genetics, physiology, anatomy, biochemistry and biophysics with those of psychology to understand the mechanisms that control behaviour and cognitive function. Understanding neural processes has applications to a variety of health and psychosocial problems including dementing diseases, traumatic brain injury, stroke, and a wide variety of developmental or drug-induced behavioural and cognitive disorders. This program prepares students for further study in neuroscience, psychology, medicine, speech pathology, and communication disorders, to name a few. Students pursuing a 3-year or 4-year BSc in Neuroscience have the opportunity to take a Business Stream – a set of core courses in the Faculty of Business that will provide them with the skills needed to enter and succeed in industry and business. See the "Science with a Business Stream" section of this Course Calendar.

NOTE ON DEPARTMENT COURSE ADMISSION REQUIREMENTS

Neuroscience students are expected to meet course requirements specified by the department offering the courses. Please note that Biology and Psychology courses may have somewhat different requirements for registration in certain courses. Biology requires no special permission to enroll in 4000-level BIOL courses, whereas Psychology requires academic advising and approval from the Honours Committee to register for 4000-level PSYC courses. Psychology approval normally requires (1) a minimum 3.0 GPA (B) in Psychology courses based on all attempts (including course repeats and failures), and (2) a minimum 2.5 GPA (C+) in all non-Psychology courses calculated as for the general degree (i.e., F's are not included, and in the case of repeated courses, only the highest grade is used). Exemptions are granted to students taking only 3 credits per term at the 4000 level.
