

CancerCare Manitoba (CCMB) is the provincially mandated cancer agency responsible for setting strategic priorities and long-term planning for cancer and blood disorders. CCMB provides clinical services to both children and adults. The cancer services the organization provides to Manitobans include prevention, early detection, and multidisciplinary cancer treatment, supportive and end-of-life care.

[The School of Radiation Therapy](#) at CancerCare Manitoba has been training radiation therapists for over 60 years in the unique requirements necessary to provide this specialized care. Radiation Therapists are involved in the planning and delivery of radiation treatments to patients who have diseases such as cancer. Therapists also perform patient assessments and provide education and emotional support to patients throughout their treatment.

CancerCare Manitoba (CCMB) is pleased to participate in a diploma/degree program with [The University of Winnipeg](#) that builds on the educational programming that CCMB offers while providing the broader educational programming that a University can offer.
