

Our name is a reflection of our mission – to Empower People In Community. We have been advocating for people living with intellectual disabilities and providing them with meaningful opportunities to participate and connect with their communities for more than four decades.

A key focus of our efforts is delivering holistic, person-centred care with the ultimate goal of empowering people in community and improving their overall quality of life. This includes providing support, resources, programs and services to people that will enable them to enjoy full and rewarding lives.

Our vision is for all people to be valued members of the community, have significant personal networks, equal access to opportunities and to contribute to a better society. We believe that everyone has inherent value, a purpose to fulfill and is deserving of unconditional acceptance.
