

St. Amant

St. Amant began as one building in St. Vital. Since 1959, the organization has grown and now 85 percent of our work is in the community through 75+ homes, a complex care residence, a school, a research centre, a community child-care centre, clinical services, day programs, and autism programs. We strive to enhance the quality of life and nurturing the independence for children and adults with developmental disabilities and autism. Drawing on a tradition of compassion and service, we strive to create and maintain a community that promotes personal growth, health and safety. We believe that all individuals possess intrinsic worth and should be recognized for who they are created to be. Today, St. Amant is a not-for-profit organization that employs over 1,900 people across the city and in rural Manitoba in full and part-time positions. St. Amant has been recognized as one of Manitoba's Top Employers seven times.
