

THE UNIVERSITY OF WINNIPEG

The Department of Anthropology and Global College's
Caribbean Research Institute proudly present:

Dr. Yadira Chinique de Armas: "Subsistence Strategies and Food Consumption Patterns of "Fisher-Gatherer" Populations from Western Cuba: From Traditional Perspectives to Current Analytical Results."

In this presentation, Dr. Yadira Chinique de Armas explores the dietary diversity of subsistence strategies and food consumption patterns of fisher-gathers populations from Western Cuba. Her research demonstrates an early use of cultigens among those groups and more cultural diversity than previously thought.

Friday, October 23rd
12:30 pm – 1:20 pm

Room 3D04

Dr. Yadira Chinique de Armas is a bioarchaeologist with expertise in gather-hunter-fishing aboriginal populations from the Caribbean, in the origins of food production in the New World, and in paleodiet studies (stable isotopes analyses and starch identification). She worked for the Department of Animal and Human Biology and the Anthropological Montane Museum (University of Havana, Cuba) for 7 years. Currently, she works as a Research Associate and an Instructor for the Department of Anthropology, University of Winnipeg.
