

FUTURE CITIES CANADA

A collaboration with The University of Winnipeg

Thursday, November 7TH

12:00–3:00PM

Leatherdale Commons
The University of Winnipeg
515 Portage Avenue

Future Cities Canada is a summit organized in Toronto and meant to provide local stakeholders with ideas to build a more inclusive, sustainable and smarter future. This year, a portion of the summit will be streamed to Winnipeg and there will be an opportunity to discuss ideas and implications locally.

Take part in this streamed session and discussions offered before and after the event, and bring your lunch.

RSVP to s.albert@uwinnipeg.ca

Time	Topic	Details
12:00 – 12:30PM	Innovative solutions to creating sustainable cities	Led by Dr. Sylvie Albert, The University of Winnipeg
Streaming 12:30 – 2:30PM	Top Trends in Canadian Smart Cities: with Open North and the Open City Network	Two of Canada's top smart city experts discuss what cities across Canada are doing to leverage technology for the benefit of everyone. Open North's Jean-Noé Landry will describe a Canadian approach to 'smart' and highlight how to get it right. Andy Best of the Open City Network will argue that we must build aspects of the smart city like public infrastructure, protect democratic institutions, drive government innovation and nurture a vibrant Canadian technology ecosystem.
	Smart Solutions for Future Cities with Smart City Challenge Winners	Getting smart means more than getting the technology right. This session will apply the learnings from the morning in a tangible way by exploring what it takes to get technology and data-focused community solutions to work for the benefit of everyone. Speakers will include the winners of Infrastructure Canada's Smart Cities Challenge and Shannon Hardin, Columbus, Ohio.
2:30 – 3:00PM	Open discussion	

THE UNIVERSITY OF WINNIPEG
