

Speak Up!

➤ Ethics Alert

Ethics Alert is your hotline service that allows employees, vendors and / or the general public to communicate issues. It addresses breaches and threats which may impact your organization — demonstrates your integrity and transparency and provides employees and stakeholders the opportunity to address concerns confidentially and anonymously.

If you experience or see anyone committing a breach of company policies, procedures or simply conducting themselves unethically, the MNP Ethics Alert Service is there for you to communicate those issues.

Your organization has set up a toll free telephone number, web portal and other means to communicate issues anonymously and confidentially. Remember:

01

If you see a breach, it is your ethical duty to report to your company.

02

There are many options available to report unethical conduct; please refer to your company intranet or policies for those means.

03

The Ethics Alert Service is designed to make confidential and anonymous complaints; it is meant as a process of last resort.

04

We are all in this together. We will come out of this stronger, safer and wiser.

Unethical acts hurt us all. Help put a stop to it.
