Course Objective

This course examines processes and policies associated with urban revitalization with a strong emphasis on rebuilding the North American city post Covid-19. By tracing the development of complex urban intervention efforts over the last 50 years, students will gain a broad understanding of the successes and challenges that result when addressing problems and solutions.

Course Description

Issues surrounding growth and development have been replaced by concerns about decline and revitalization in many North American and European cities. This course will focus on urban decline and revitalization efforts. Theories of decline and the demographic, economic, and physical changes that occur in declining city neighbourhoods will be discussed. The course will then explore revitalization efforts, drawing extensively on case study material from selected cities as well as field and project work within Winnipeg. Broad approaches to revitalization; revitalizing the housing and commercial sector; attracting people back to the inner city; the role of government, community and the private sector; rejuvenating older, greying suburban neighbourhoods; and planning for long term sustainability will be amongst the topics discussed.

Textbook

There is no textbook for this course; assigned readings will be distributed weekly. Assigned readings are compulsory for the mid-term test and final examination and will be available through University of Winnipeg databases.

4. Be able to assess and evaluate urban intervention projects using data and visual information.

Exceptions are research activities done in class as a learning exercise. For submission requirements and deadlines, see <http://www.uwinnipeg.ca/research/human-ethics.html>

Students may choose not to attend classes or write examinations on holy days of their religion, but they must notify their instructors at least two weeks in advance. Instructors will then provide opportunity for students to make up work or examinations without penalty. A list of religious holidays can be found in the 2021-22 Undergraduate Academic Calendar.
