3. Effective September 7, 2021, the University of Winnipeg will require all those coming to designated indoor campus spaces to be fully vaccinated or declare that they are either (a) fully vaccinated and will provide proof of same by October 15, 2021; or (b) partially vaccinated and will be fully vaccinated and provide proof of same by October 15, 2021. BACKGROUND

The University of Winnipeg has a COVID-19 Vaccine Mandate that requires all students and employees to provide proof of full vaccination to attend campus, effective September 7, 2021.

The University of Winnipeg requires your verification that the above-named applicant (student or employee of the University of Winnipeg) has a medical need to be exempt from the requirement to be fully vaccinated for COVID-19. Exemptions (or other accommodations) may occur only with appropriate documentation provided to the University (Accessibility Services or the Employee Health and Wellness Specialist).

VERIFICATION OF DISABILITY

1. Does the patient have a medical disability-related barrier to complying with the requirement to be fully vaccinated for COVID-19? Exemptions or other accommodations will be considered for individuals with a medical condition(s) recognized by The National Advisory Committee on Immunization (“NACI”) or comparable authority which precludes them from receiving the COVID-19 vaccine.

- € Yes, the patient has a medical condition recognized by the NACI (or comparable authority).
- € No, the patient does not have a medical condition recognized by the NACI (or comparable authority).
- Assessor to provide additional details regarding the associated functional limitations:

Please Note:

- The National Advisory Committee on Immunization* states that their recommendations to receive COVID-19 vaccinations now also apply to individuals who are:
 - Immunocompromised
 - Pregnant or breastfeeding
 - Have an autoimmune condition
- The following are examples of conditions that are not considered for a medical exemption:
 - Severe allergic reactions to foods, oral medications, latex, pets, insects, environmental triggers
 - Fear of needles
 - History of vaccine side effects (without further evidence related to the COVID-19 vaccine)

- General avoidance of vaccines
- A history of COVID-19 infection or positive antibody screen is not a substitute for vaccination.
- Manitoba Shared Health, in its published FAQ, entitled “COVID-19 Vaccination & Health Workers”, updated August 24, 2021, stated:

Expert opinion was provided, based on existing and evolving evidence and clinical practice, about whether there are patient populations that cannot be immunized for medical reasons. It was determined that medical exemptions are not warranted for the COVID-19 vaccine. There are specific situations, however, where vaccination may be delayed, typically no longer than three months. Please connect with your health care provider for more information.

2. Length of Exemption

- € Permanent
- € Temporary from (dd/mm/yyyy): _____ to _____

3. Optional: Additional information – Please provide any other information about the applicant’s disability/disabling condition (but not the specific diagnosis) and their functional limitations that the University of Winnipeg should consider:

4. My medical opinion is based on:

___ Patient History ___ Examination ___ Objective Evidence Confirmed (signs or investigational data)

I certify that the above-named applicant has a diagnosed medical condition that prevents them from being vaccinated against COVID-19, and that to the best of my knowledge the information provided to me by the applicant is accurate, and I support the request for a medical exemption or an accommodation related to the COVID-19 vaccine requirement.
