

Senate Research Policy Committee Annual Report

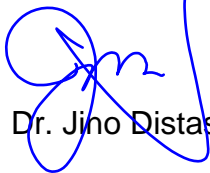

May 1, 2020

The Senate Research Policy Committee met once this year and unanimously endorsed revising the name and terms of reference of the committee to better reflect current research at the University of Winnipeg. The Committee hopes to have a revised terms of reference within the next month and will forward a motion to Senate for consideration.

Additionally, over the coming months, this committee will work on revising and updating the Research Manual and supporting upcoming initiatives. Overall, the intent is for the committee to play a more consistent role with respect to advising and supporting the direction of research activities.

While the committee has met infrequently over the last few years, going forward the idea is to increase frequency by having more opportunities to provide timely input.

Respectfully,

Dr. Jino Distasio

Vice-President Research and Innovation
