

Why should I switch to the Outlook app?

Changes are coming to improve the security of our university email that will impact your ability to access these services. Get ahead of the change and install the Microsoft Outlook mobile app now.

There are many benefits to using the Outlook mobile app:

- Provides the best user experience for email and calendar on mobile devices
- Enables a more secure sign-in and better protects accounts
- Offers better features and reliability

If you are already using the Outlook app, look to see if you have your account set up in another Mail, Calendar or Contacts app. **Do NOT uninstall the Outlook app.**

To switch to using the Outlook mobile app, first remove your **account** from the current email app (Mail, Gmail, Email) on your mobile device and then install and configure the Outlook app. **Do NOT** delete the app itself.
