<b>Note: RHET-2131-001</b> - This course aims to demystify "prose style" and teach you some elements of its craft. We'll study verb style, to give your prose more action and snappy rhythm. We'll study noun style, the preeminent style in business and the social sciences. Finally we'll study "cumulative" style, or "running" style. You don't want all your sentences to sound snappy, and cumulative syntax brings longer rhythms and deeper texture into your prose. Major creative writers use it a lot, but it appears in the best academic prose and business memos as well.

**Note: RHET-3255-050** - The first goal of this course is to identify the key components and conventions of narrative writing in contemporary essays, scholarship and autoethnographic studies. We'll read and write narrative as a flexible and dynamic genre, while taking onto consideration elements that are often repeated. The second goal involves looking beyond structure to consider the appeal of narratives: why do we turn to narratives rather than data-based reports? Why do we find some stories more satisfying than others? In what ways is narrative convincing as evidence? We will consult theory about narrative and samples of narrative inquiry, argument, and essay.
